Xanadu Wireless acquires Ubiwave and receives further investment

Utrecht, Netherlands, July 2007 – Xanadu Wireless, a Utrecht, The Netherlands, based fabless semi-conductor company, today announced the completion of the acquisition of Ubiwave, the Zele, Belgium, based leading provider of wireless systems technology for sense- and control networks, for an undisclosed amount.

Xanadu also announced that it has received a further €2M of investment from existing investors GIMV, Esprit and Motorola Ventures.

Cees Links, CEO of Xanadu Wireless states "This acquisition represents a key milestone in our strategy. The unique technology differentiators of Xanadu and Ubiwave are totally aligned and complement each other to provide best in class low power wireless data communication. With the growing adoption of wireless sense and control technology, we are offering solutions that will truly revolutionize the world of wireless sensor networks."

Niek Van Dierdonck, CEO of Ubiwave adds: "Integrating our activities allows us to make a significant leap forward in providing the state-of-the-art in wireless sensor technology. Later this year we will launch our combined platform delivering what the market has been requesting in the last few years: easy to install, easy to maintain sensor networks where the elimination of wiring provides true customer value."

About Xanadu

Xanadu Wireless is a fabless semiconductor company developing IP, chips and modules for the wireless data communication industry based on the IEEE 802.15.4 and ZigBee standards. These standards have been developed for the wireless sense and control market.

Xanadu Wireless is focusing on the industrial and logistics markets, as well as on the building and home markets.
